SITUATION SUMMARY

Cal OES SOUTHERN REGION

El Segundo, Los Angeles, Los Angeles County, Spill: 17-0401

On 01/12/17 at 1521 hours, the California State Warning Center (CSWC) was advised by the El Segundo Fire Department (FD) that 3 railcars derailed on their sides in El Segundo, Los Angeles County.

- The railcars contain Liquid Petroleum Gas. There has been no release of hazardous materials at this time.
- It is believed that this is a Burlington Northern Santa Fe (BNSF) train, but this is unconfirmed.
- Per the Cal OES Southern Region Duty Officer (SDO):
 - The derailment involved 3 cars that overturned, all 3 cars were loaded with Liquid Petroleum Gas, but they are all intact and no spill has occurred.
 - Three or four small businesses were evacuated, along with a few rail workers, but there were no injuries or deaths.
 - The Metro Green Line has been diverted, and Metro has an Agency Representative at the Command Post.
 - Per the Incident Command Post no further assistance is needed from the OA at this time.
- The Cal OES Fire Duty Officer (FDO):
 - The El Segundo FD is on scene.
 - There was a slow derailment of 3 rail cars due to ground saturation and the tracks sinking.
 - There are no leaks of any Hazardous Materials, Los Angeles County Haz-Mat 105 was dispatched, but has been released from the incident at this time.
 - The Metro Green Line has been closed with the estimated time of reopening at 0300 hours on 01/13/17.
 - RR personnel as well as Chevron Fire personnel will remain on scene. Heavy lift equipment is scheduled to arrive at 2000 hours to commence the lifting of the rail cars back onto the secured tracks.
- The Cal OES Law Duty Officer (LDO) advised that per Los Angeles County there were no evacuations.
- The Cal OES Duty Officers will continue to monitor the situation.
- The CSWC has made notifications according to Standard Operating Procedures (SOP).

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

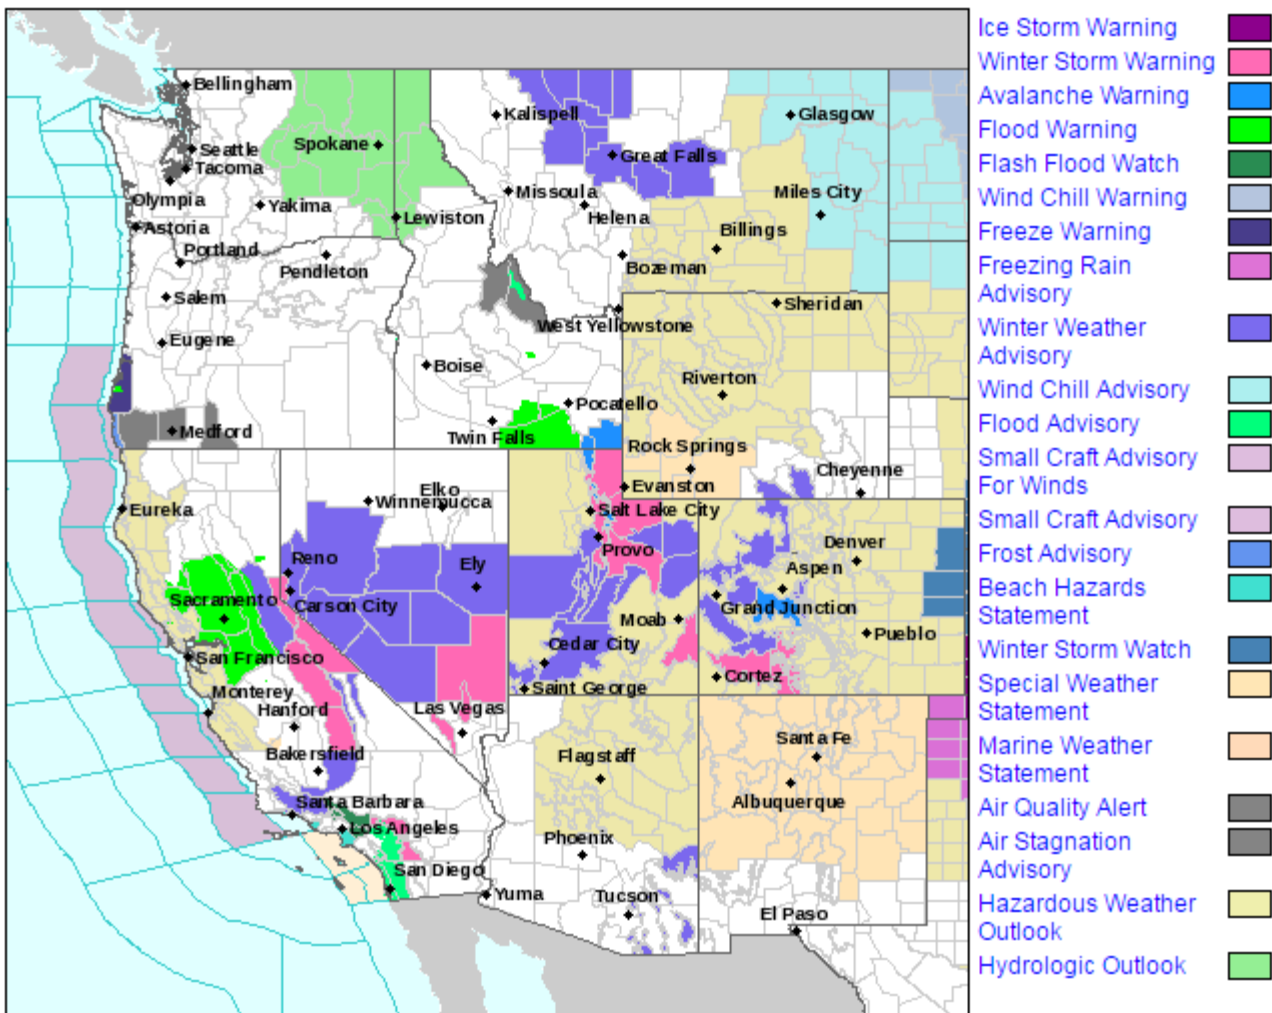

A Pacific low pressure system has moved onshore just north of the Bay Area and it will move southward over Southern California later today. Rain and mountain snow will mainly fall from Lake and Plumas Counties south today, with snow levels around 3000 feet. Isolated showers are possible in the mountains farther north today. Dry weather is expected tonight through Monday as high pressure moves over the region. North to Northeast surface winds in the northern Sacramento Valley and nearby foothills will produce clear, dry, and warmer conditions, while the southern Sacramento Valley and many other basins and canyons will have dense fog develop. In some locations the dense fog will persist around the clock. On Tuesday the first of the next series of wet Pacific storm systems will reach the coast with light to moderate rain and gusty Southeast to Southwest. Snow levels will be 5000-7000 feet Tuesday night and Wednesday as heavier precipitation spreads inland. Snow levels will fall by 2000 feet or so on Thursday as colder air moves in. Wet unsettled weather is expected to continue for several days beyond that.

SOUTHERN CALIFORNIA

The last in a series of storms will work its way down the California Coast bringing periods of rain to the entire region through this evening. Showers will end across Central California by early Friday morning, but continue across Southern California through Friday evening. Most locations including the deserts will receive between a half inch and 2 inches of rainfall with this storm. The snow level will be around 4,000 feet. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas through this afternoon. Maximum temperatures will be around 10 degrees below normal through Friday, with 30s to low 40s across the mountains and upper 40s and 50s in the valleys. A slow warming and drying trend will take place Saturday through early next week as a ridge of high pressure builds into California from the Pacific Ocean. Temperatures will be near normal early next week. North to northeast winds of 20 to 30 mph with gusts to 50 mph will surface across the mountains and below the canyons and passes of Southern California Friday evening through Saturday afternoon. Another series of Pacific storms look to move into Central and Southern California starting Wednesday with periods of heavy rain, strong south to west winds, and below normal temperatures.
